

Section E: Support Services

EBB Safety and Health Education

An effective occupational safety and health education program shall be conducted, with its prime objective being accident prevention in the school, at work and at home. In further support of this policy, the Board shall adhere to and be compliant with applicable state and federal regulations.

Whenever there is an accident involving a student, employee or visitor to the schools, an accident report must be completed and applicable procedures followed. Accidents involving employees shall be reported immediately to the Director/designee and appropriate forms completed as outlined in the Staff Handbook. A Student Incident Report shall be completed by staff for any accident involving a student and given to the Director/designee.

The Director shall be responsible for implementation of this policy and shall make necessary appointments and delegate authority to see that effective safety training and procedures are carried out at all levels.
