Authorized Use of School-Owned Materials and Equipment Computer Software

The purpose of this policy is to ensure and support the use of appropriate and approved computer software throughout Region 8.

Region 8 follows all licensing requirements for computer software. Software installed on Region 8 computers will be acquired through legal means and through Region 8 purchasing procedures used for textbooks and other instructional materials. Software owned by Region 8 will not be distributed beyond the licensed allowance.

The Board will be kept apprised of computer software in use in the school through two means:

1. The Computer Systems Manager will provide a periodic listing of software in use throughout the school.
2. Program instructors will include in their Biennial Program Review a description of program-specific software in use.
